***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22, 67, 70, and 73-97 (part of each, drawn to the methods of claims 1 and 73 wherein the triazolopyrimidine derivatives have the following substituents:

**R<sup>1</sup> is not a ring of 7-, or 8-member, or a spiro ring;**

**R<sup>2</sup> is an optionally substituted phenyl group.**

classified in classes 514, and 544, various subclasses depending on the substituents.

- II. Claims 1-22, 67, 70, and 73-97 (part of each, drawn to the methods of claims 1 and 73 wherein the triazolopyrimidine derivatives have the following substituents:

**R<sup>1</sup> is a ring of 7-, or 8-member;**

**R<sup>2</sup> is an optionally substituted phenyl group.**

classified in classes 514, and 540, various subclasses depending on the substituents.

- III. Claims 1-22, 67, 70, and 73-97 (part of each, drawn to the methods of claims 1 and 73 wherein the triazolopyrimidine derivatives have the following substituents:

**R<sup>1</sup> is a spiro ring;**

**R<sup>2</sup> is an optionally substituted phenyl group.**

classified in classes 514, and 540, various subclasses depending on the substituents.

Art Unit: 1624

IV. Claims 1-22, 67, 70, and 73-97 (part of each, drawn to the methods of claims 1 and 73 wherein the triazolopyrimidine derivatives have the substituents not listed in the above groups. Further restriction and election will be required if this group is elected.

Inventions groups I through IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different combinations of ring systems for substituents. Although all groups share a common core of triazolopyrimidine, it does not define the invention. Furthermore, said common core is known, and is not applicant's contribution to the art. Besides, a reference for a 102 rejection of one group would not obviate the rejection of another group. Thus, each group is patentably distinct over the other.

A telephone call was made to Mr. Daniel Moran on 9-26-03 to discuss the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1624

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
